---

How to Stand Strong  
in the Storms of Life

*Matthew 7:24-27*

An aerial photograph of a tropical beach. The top half of the image shows vibrant turquoise water with visible coral reefs. A narrow strip of white sand beach runs horizontally across the middle. The bottom half of the image is filled with dense, lush green tropical vegetation, including many palm trees.

# JESUS | CHANGES | EVERYTHING

*Part 22*

# Matthew 5

- How to heed the warning lights of anger
- Don't ignore sensual warning signs
- Keep your promises
- Divorce and remarriage
- What a Christian is supposed to do when they have been treated unfairly

SERMON  
on the  
MOUNT

# Matthew 6

- How to pray
- What does the Bible say about fasting?
- How will you invest the resources of your life?
- God's answers for *worry*

SERMON  
on the  
MOUNT

# Matthew 7

- Do not judge: the difference between a critical spirit & critical thinking
- Two roads of life ... life's greatest decision
- How to identify false teachers

SERMON  
on the  
MOUNT

Every person here is building his  
life on one of two foundations:

-----

1. If you build your life on the SAND,  
you're going to be in big trouble.

*but ...*

2. If you build your life on the ROCK,  
you will stand strong in the  
roughest of life's storms.

The background is a blue grid with faint white architectural drawings. These drawings include lines, arrows, and dimension lines. On the left, there are vertical dimension lines with labels '100', '50', and '100'. On the right, there is a vertical dimension line with a label '200'. At the bottom, there is a horizontal dimension line with a label '10000'.

# Principle #1

The key building factor  
is not so much about  
materials and forms,  
the key is foundation.

The background is a blue grid with faint white technical drawing lines, including axes, arrows, and dimension lines with numerical values like 100, 50, and 10000.

# Principle #2

Sunny days are not  
the measure of a  
stable house/life.

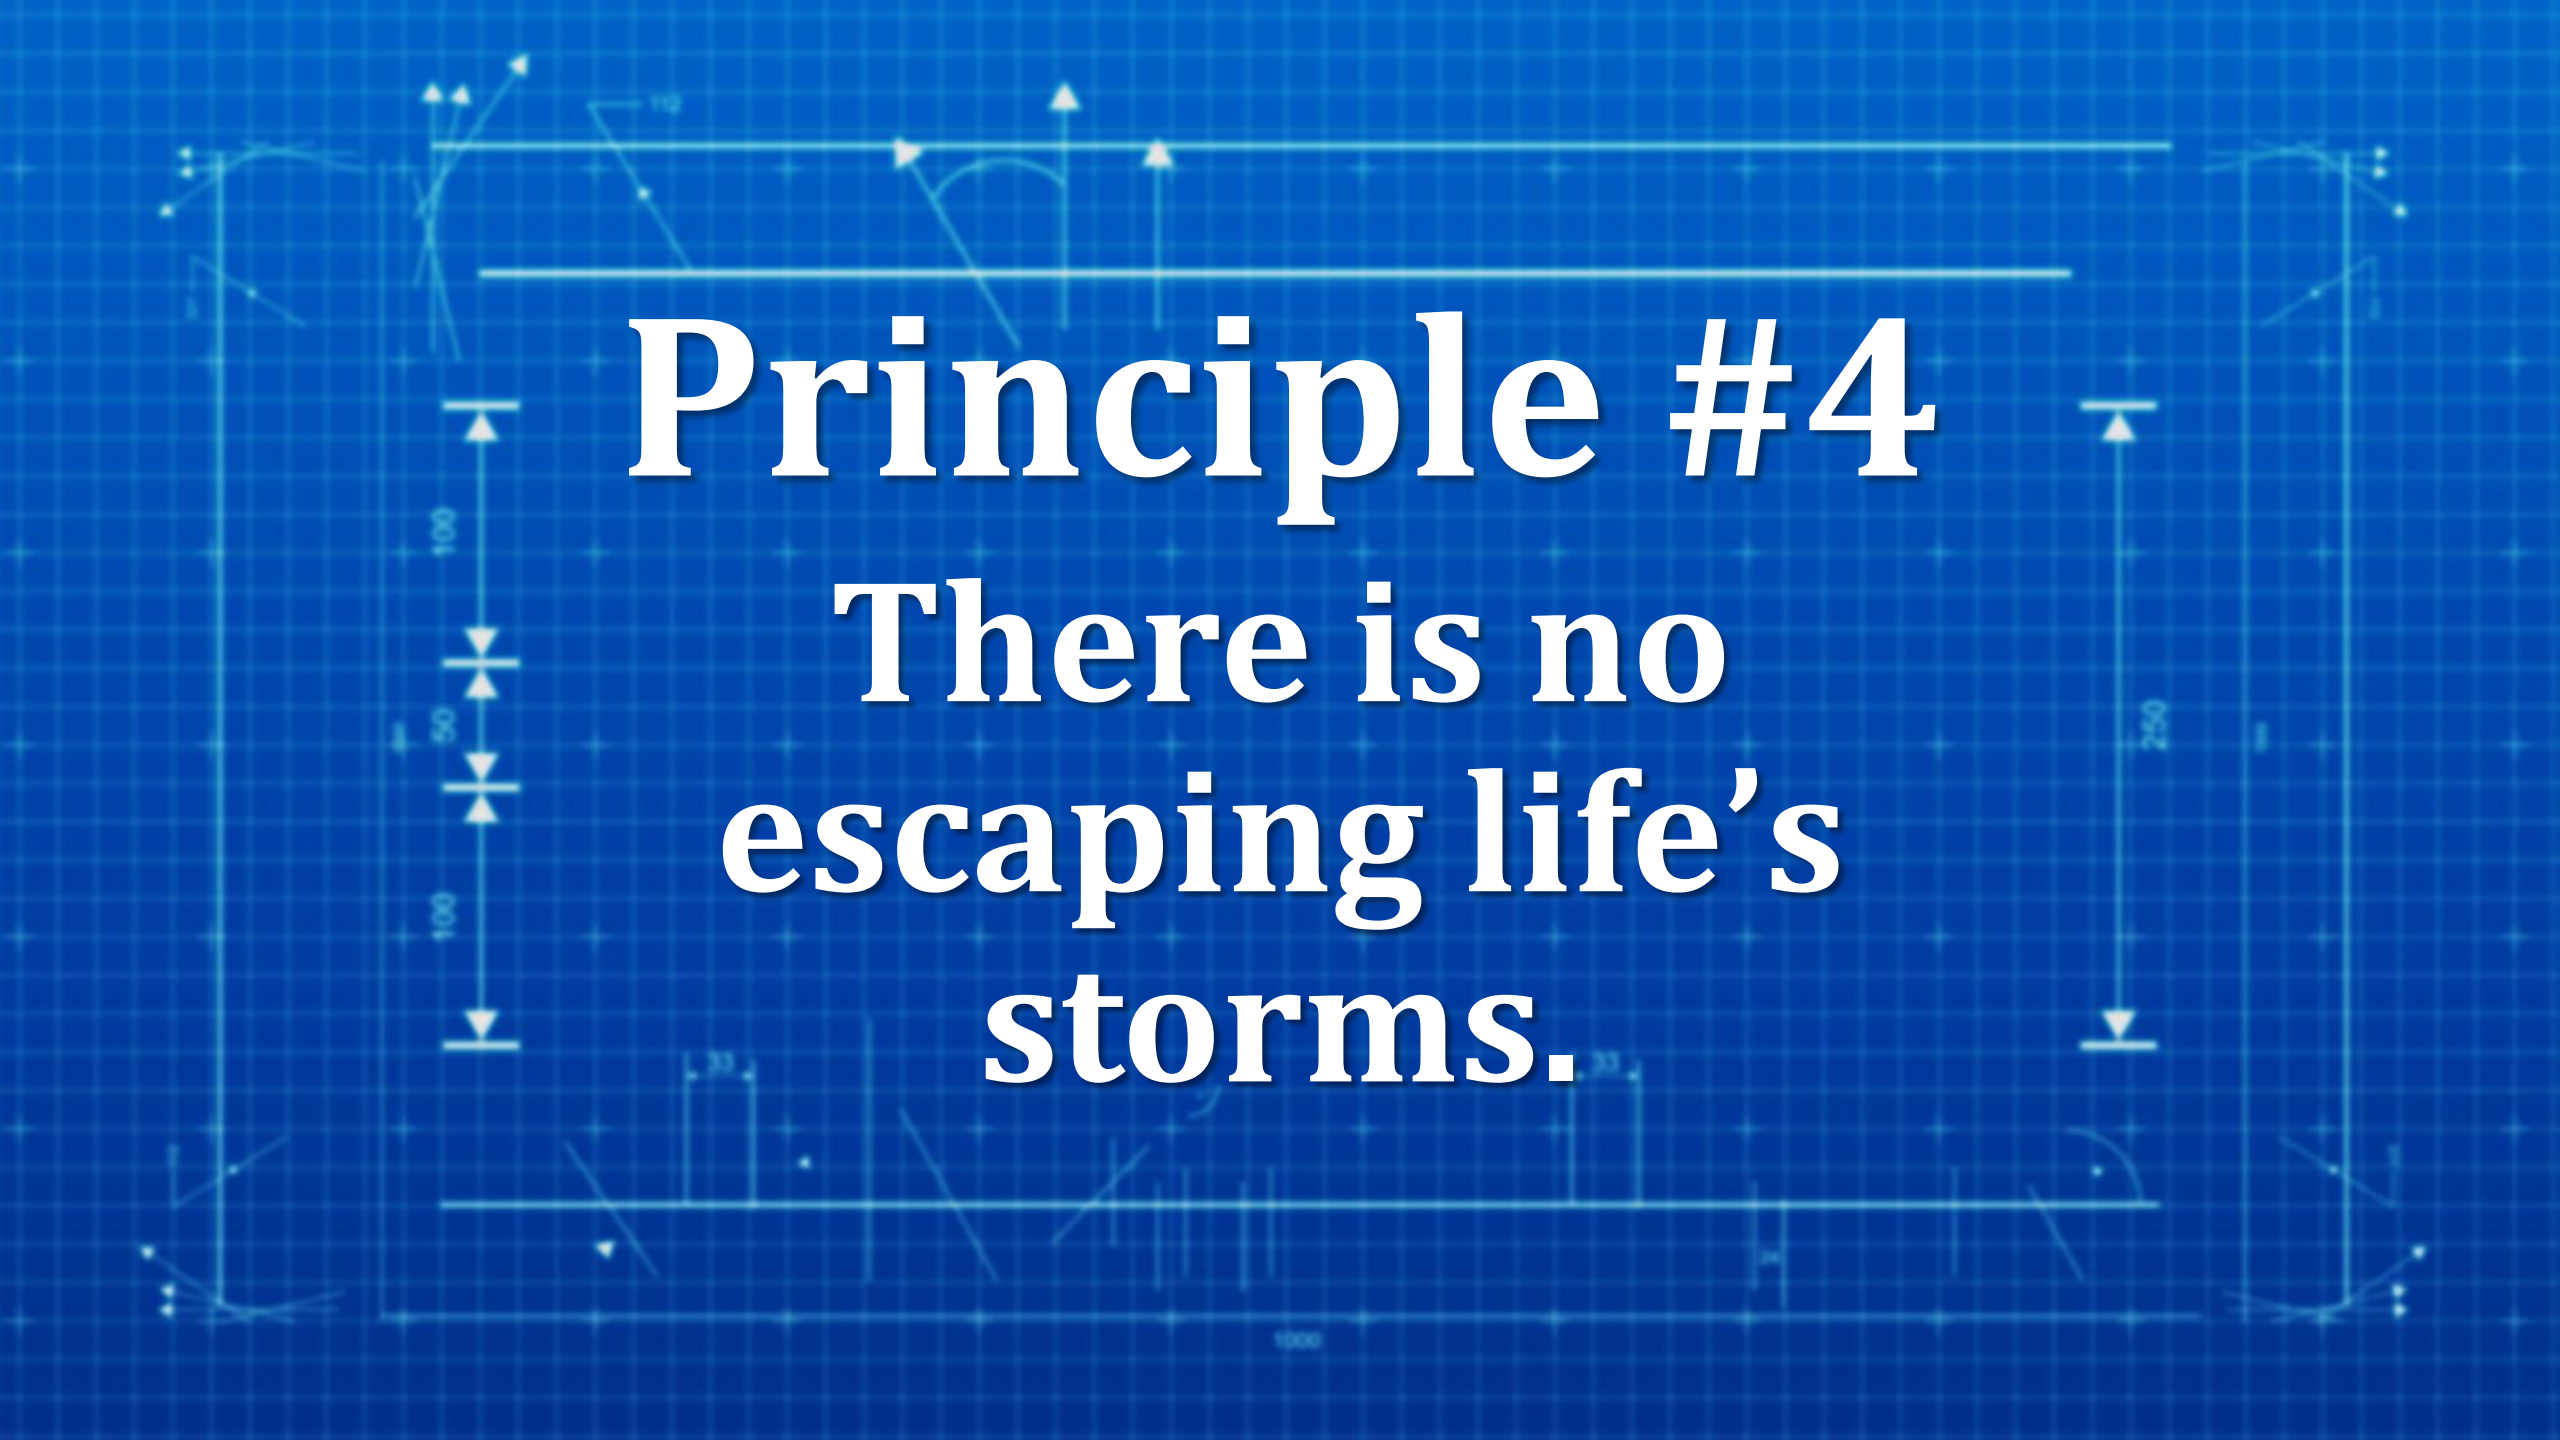

The background is a blue grid with faint architectural drawings. These include a floor plan at the top with rooms and doors, a vertical section on the left with dimensions 100, 50, and 100, and a vertical section on the right with a dimension of 200. There are also some smaller details and lines scattered across the grid.

# Principle #3

The storms of life  
reveal the strength  
of the foundation.

The background is a blue grid with faint white technical drawing lines. These lines include horizontal and vertical axes, various geometric shapes like circles and arcs, and dimension lines with arrows and numbers (e.g., 100, 50, 200, 1000).

# Principle #4

There is no  
escaping life's  
storms.

# There are no storm-free zones!

---

*It's not about avoiding the  
weather - it's about foundations!*

A close-up photograph of a construction worker's hand holding a bright yellow hard hat. The worker is wearing a dark grey or black jacket with visible buttons and a pocket. The background is a blurred, warm-toned construction site.

**You have entered a  
construction zone!**

***We are in here building lives!***
